SUBJECT: AOS Acquisition of Stauffer Chemical's Synthetic  
Lubricant Business

I am happy to announce that on December 18, 1984, AOSI purchased the Synthetic Lubricant Business of Stauffer Chemical Company of Westport, Connecticut.

We have purchased Stauffer's Synthetic Jet Turbine products; Jet II (MIL-L-23699), Jet III (MIL-L-7808) and STL (Stationary Turbine Lubricant). Also purchased are Stauffer's Synthetic Compressor Fluids SL (Diester and SL-XP (Polyol Ester)).

We will be marketing these products under the AOSyn Brandname through our present distribution network as well as to Stauffer's distributors worldwide.

This acquisition puts AOSI in a very strong position as a compounder/supplier of Synthetic Lubricants into both the turbine and compressor markets.
